DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-32** are allowed.

2. The following is an examiner's statement of reasons for allowance:

Regarding **claim(s) 1 and 30**, they are directed to estimate a transmitting power needed based on the result of the estimation of the behavior of the transmission channel, wherein the power control information item is generated on the basis of the estimated transmission power needed and is transmitted to the transmitter and the estimated behavior of the transmission channel in dependence on the result of the prediction of the behavior of the transmission channel.

The closest prior art of record is Kobayakawa, as applied in the previous action. Although many different transmitters would have been able to perform the same function as the claimed transmitter, they would not have done so in the same way. Thus alternate transmitters would not have been equivalent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
